

WALGREENS:

Abortion pills hurt women.

We're here today because Walgreens has begun selling abortion pills in some of their stores, turning neighborhood pharmacies into abortion facilities.

They claim abortion pills are safe, but the truth is the Food and Drug Administration quit tracking non-fatal complications in 2016.

Studies have shown pill abortions to be four times more dangerous than surgical abortions, with complications happening twenty percent of the time.

Tell your pharmacist that Walgreens should stop selling these dangerous drugs at neighborhood pharmacies!
